

To start your method development, simply follow one of the paths for your analyte and find your recommended column:

Reverse Phase Method Development

Normal Phase Method Development

SEC Method Development

These columns are recommended as the starting column based off your analyte chemistry. Develosil has a wide selection of columns to help you improve your retention and selectivity. Please contact us for more information about our full product lineup.

Have a certain application in mind?

See below for our recommended column based on your application.

Organic Acid Applications

Reverse Phase

Develosil HSR AQ C18
Develosil HSR C1
Develosil RPAQUEOUS-AR

Vitamin Applications

Water Soluble Vitamins

Reverse Phase:
Develosil HSR AQ C18
Develosil RPAQUEOUS
Develosil RPAQUEOUS-AR

HILIC:
Develosil NH2
Develosil ANIDIUS

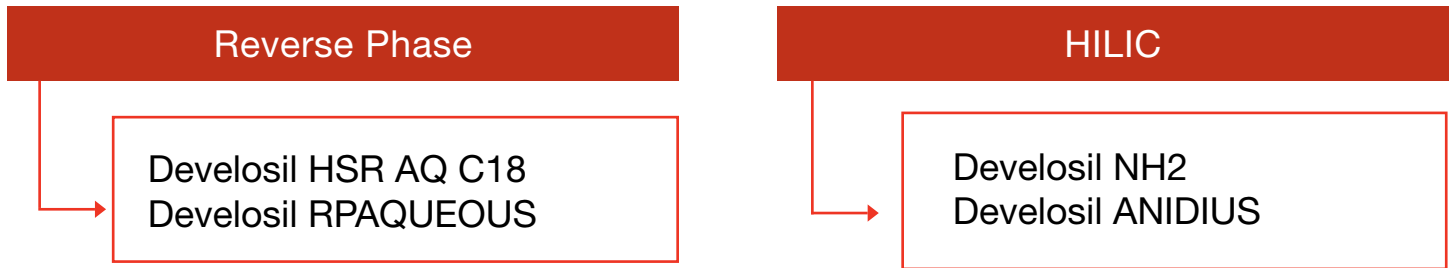

Fat-Soluble Vitamins

Normal Phase and HILIC:
Develosil 30
Develosil 60
Develosil 100
Develosil NH2
Develosil ANIDIUS

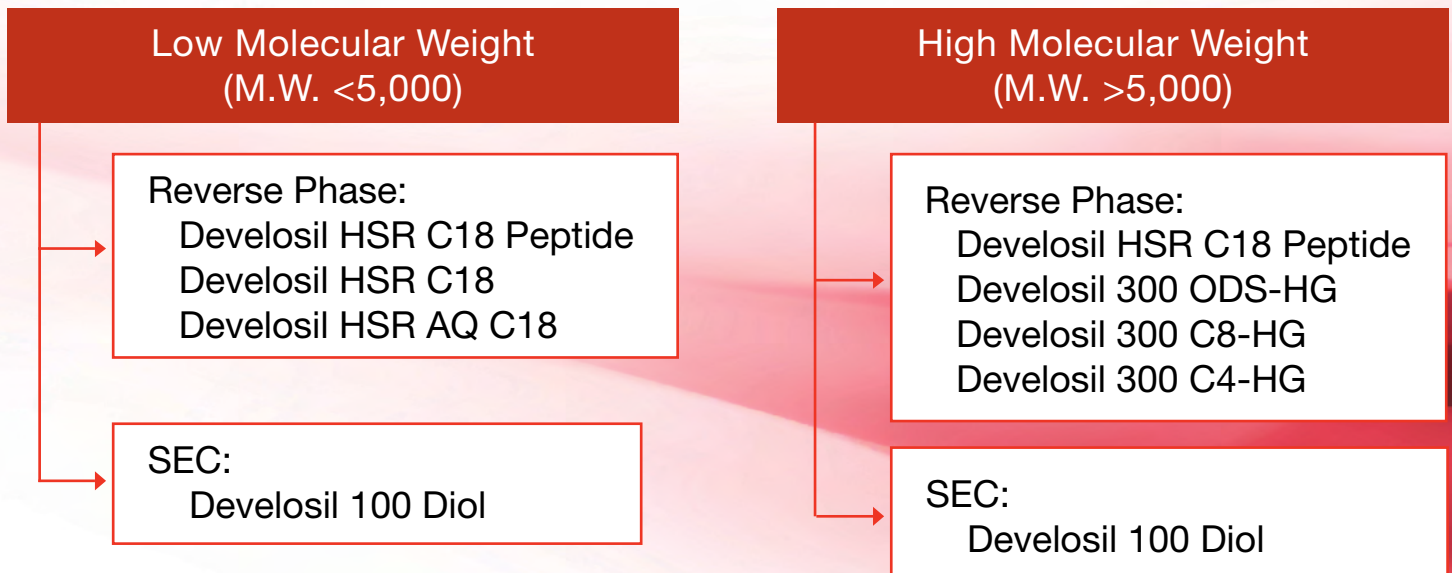

These columns are recommended as the starting column based off your application. Develosil has a wide selection of columns to help you improve your retention and selectivity. Please contact us for more information about our full product lineup and visit our website for application notes.

Have a certain application in mind?
See below for our recommended column based on your application.

Carbohydrates Applications

Amino Acid, Peptide, Nucleic Acid, and Protein Applications

These columns are recommended as the starting column based off your application. Develosil has a wide selection of columns to help you improve your retention and selectivity. Please contact us for more information about our full product lineup and visit our website for application notes.

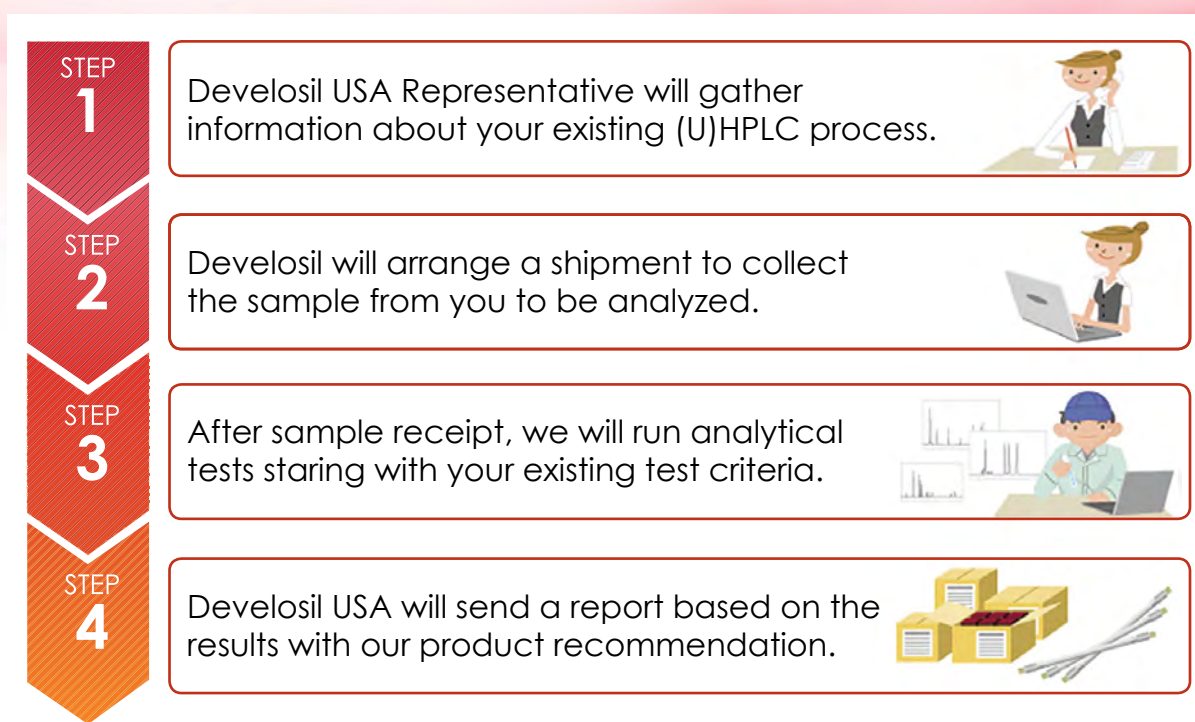

Develosil USA is offering a column transfer service with FREE analytical testing to help customers find the best Develosil column for their HPLC and UHPLC processes.

Features

Save time - Transitioning to a new column may be difficult and time consuming. Let us help and we can save you time.

Trust Nomura Chemical Expertise - Nomura Chemical, Co. Ltd. have been manufacturing Develosil columns since 1979 and can offer the expertise to help select which Develosil column will work best for you.

Switching to Develosil is EASY!

*Restrictions

Detectors available for HPLC analysis is UV detector, fluorescence detector, and differential refractometer.

There may be charges for shipping and reagents costs.

It's a prerequisite to present current analysis conditions. If you don't have a current method, please try our Method Development Service.

Develosil USA is offering a Method Development Service* to help customers find the analysis conditions and (U)HPLC column for their separation needs!

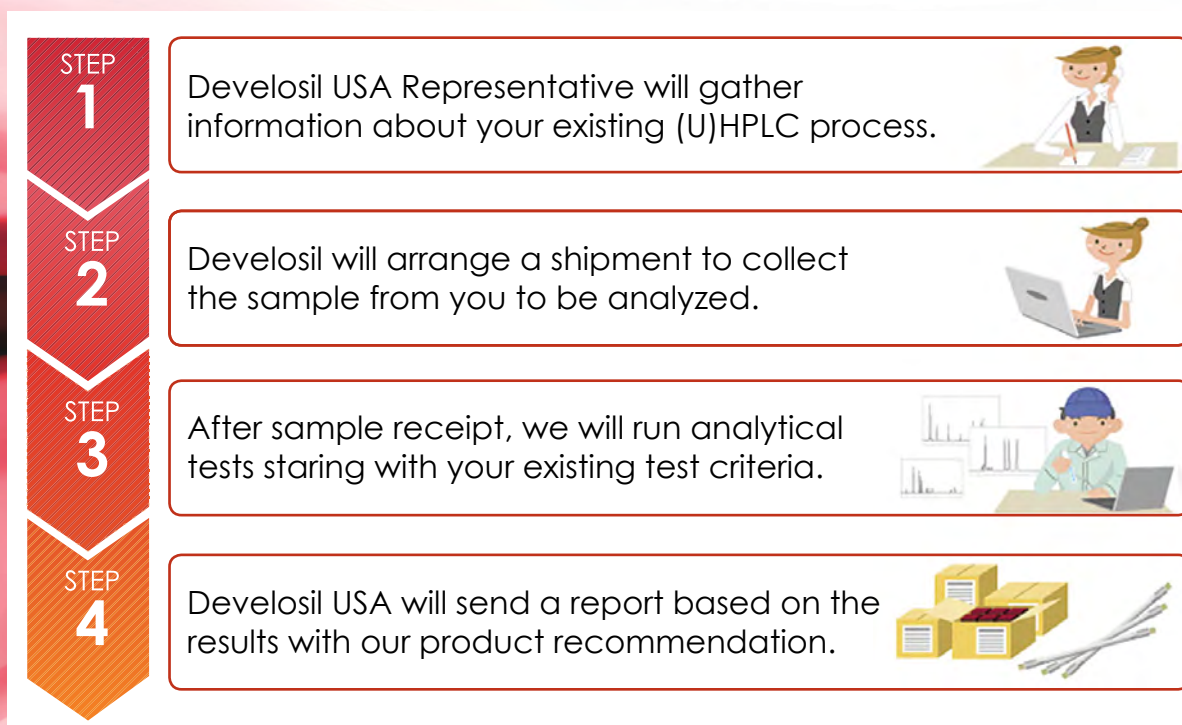

Features

Save time and frustration - Changing analytical conditions and columns to fit your separation can be a time-consuming process. Everything can be managed under one roof using our Method Development Service

Trust Nomura Chemical Expertise - Nomura Chemical, Co. Ltd. have been manufacturing Develosil columns since 1979 and can offer the expertise to help find the method for your separation needs.

Reporting to your needs - Confidentiality is important to us. Corresponding can be done to your format if required.

Method Development is Easy!

*Restrictions

Detectors available for HPLC analysis is UV detector, fluorescence detector, and differential refractometer. If LC/MS is required, our reporting will reflect it.

Total charges include, but are not limited to the base fee, shipping costs, and reagents costs.
